EDUCATION

University of Washington (3.9 GPA)

Pursuing B.S. Informatics (Data Science)

Seattle, WA

September 2025 – June 2027

Bellevue College

Bellevue, WA

Completed Associate's in Arts and Sciences

September 2023 – June 2025

CORE SKILLS

**Agentic Automation
Business Intelligence**

**Cloud Computing (AWS)
Full-Stack Development**

**Data
LLMs**

Technologies: Python, AWS, Azure, GCP, R, SQL, Tableau, Excel, Java, TypeScript, Next.js, React, Git, AI, Tailwind CSS, QuickSuite, JavaScript

EXPERIENCES

Proofpoint – *AI Integrations Engineer Intern*

Remote June 2026

- Building and deploying agentic AI workflows and multi-agent orchestration systems on Amazon Q Business / Quick Suite.
- Engineering prompt and context strategies to optimize AI agent behavior and security guardrails.

Socratics.ai – *AI Systems Engineer Intern*

Seattle, WA March 2026 – May 2026

- Engineered AI document processing pipeline for financial data ingestion, model-driven classification, and HITL validation.
- Presented AI workflow architecture to executive team, defining automation strategy and feature priorities for production.

AirPLAi Sports – *AI Product Engineer Intern*

Seattle, WA January 2026 – March 2026

- Tuned AI chatbot prompt workflows and data retrieval logic in Python (FastAPI / LangGraph.)
- Created UI + Backend features, debugging, running tests, and resolving CI/Dev issues. (GCP, Docker, React / Next.js).
- Built cloud-based data pipelines and features that improve data reliability and operational workflows.

Web Impact UW - *Full Stack Developer*

Seattle, WA January 2026 – June 2026

- Developing features across React frontend, API routes, and backend, owning implementation to deployment under deadlines.
- Collaborating cross functionally with design and product leads to deliver user focused web solutions for external clients.

Costco Wholesale - *Member Service Agent*

Issaquah, WA February 2024 – June 2026

- Assisted customers through complex issues via chat/phone, translating technical processes into clear explanations.
- Consistently exceeded performance expectations by over 50% through strong communication and problem-solving.

Everlane Landscaping - *Data Science Intern*

Kirkland, WA July 2025 – September 2025

- Built automated Python pipeline to process 100+ monthly logs, optimizing routing, reducing job-time by 15%.
- Conducted data modeling to identify high-value customer segments, leading to a 12% increase in customer retention.

PROJECTS & CERTIFICATIONS

Personal Productivity System – *Custom Obsidian Dashboard*

April 2026

- Built a custom dashboard aggregating task management, goal tracking, and live health metrics in a single view.
- Integrated the WHOOP REST API using OAuth 2.0 with automated token refresh, pipeline to sync daily health metrics.
- Deployed Dockerized MCP server to connect Claude AI to vault, enabling natural language application management.

Marcus's Portfolio – *Online Portfolio*

January 2026

- Built a developer portfolio styled as a an IDE with file explorer, tabbed editor, and drag-and-drop UI using HTML/CSS/JS.
- Integrated a real-time AI chatbot powered by Claude Haiku via Vercel serverless functions and SSE streaming.
- Connected structured JSON knowledge base with metadata to Haiku integration using RAG to ground responses.

Nick-Blendz Barber Website - *Online Booking Application*

June 2025 – July 2025.

- Built + deployed full stack booking platform using Next.js, TypeScript, and AWS EC2, S3, and RDS supporting 100+ users.
- Designed database schema and backend to manage scheduling and client data, reducing manual booking work by 80 percent.
- Integrated third party scheduling API and built analytics dashboards to track booking volume and retention.

AWS (3x): Solutions Architect Associate (SAA-C03), Certified Cloud Practitioner (CLF-C02), Certified AI Practitioner (AIF-C01)

MICROSOFT AZURE (3x): Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900), Azure Data Fundamentals (DP-900)

COMMUNITY ENGAGEMENT

Kappa Theta Pi

Seattle, WA

Education Committee Director – Directed development content for professional tech-based fraternity members.

January 2026 – Present

NetworkAI

Seattle, WA

Director of Technology – Leading club-sponsored workshops to teach and develop AI solutions and projects.

January 2026 – Present

Business Impact Group

Seattle, WA

Consultant – Collaborated with client Socratics.ai. Was invited to return after engagement for internship.

January 2026 – March 2026

Other Campus Involvement: AWS Cloud Club, Claude Builder Club, Web Impact UW, UW Newman Center

LANGUAGES & INTERESTS

Interests: Hiking in Washington, Mountain Biking, Lakers, Running, Weightlifting, Seahawks
