EDUCATION

University of Washington (3.9 GPA)

Pursuing B.S. Informatics (Data Science), Minor in Business

Bellevue College

Completed Associate's in Arts and Sciences

Seattle, WA

September 2025 – June 2027

Bellevue, WA

September 2023 – June 2025

CORE SKILLS

Full Stack Development

Agile Methodologies

Data/DBs

Data Visualization

Cloud Computing

LLMs

Technologies: Python, R, SQL, Tableau, Excel, AWS, Azure, GCP, Java, TypeScript, Next.js, React, Git, AI, Snowflake, Tailwind CSS

EXPERIENCES

AirPLAi Sports – AI Product Engineer Intern

Seattle, WA January 2026 – Present

- Tuning AI chatbot prompt workflows and data retrieval logic in Python (FastAPI / LangGraph.)
- Creating UI + Backend features, debugging, running tests, and resolving CI/Dev issues. (GCP, Docker, React / Next.js).
- Building cloud-based data pipelines and features that improve data reliability and operational workflows.

Socratics.ai – Product Engineer Intern

Seattle, WA March 2026 – Present

- Building a full-stack financial document processing pipeline supporting Excel ingestion, AI-suggested classifications, HITL interface, and structured data export. Collaborating with cross-functional team and product stakeholders throughout process.

Web Impact UW - Full Stack Developer

Seattle, WA January 2026 – Present

- Developing features across React frontend, API routes, and backend, owning implementation to deployment under deadlines.
- Collaborating cross functionally with design and product leads to deliver user focused web solutions for external clients.
- Implementing UI components with shadcn and delivering maintainable code with best practices through GitHub workflows.

Costco Wholesale - Member Service Agent

Issaquah, WA February 2024 – March 2026

- Assisted customers through complex issues via chat/phone, translating technical processes into clear explanations.
- Consistently exceeded performance expectations by over 50% through strong communication and problem-solving.

Everlane Landscaping - Data Science Intern

Kirkland, WA August 2025 – November 2025

- Built automated Python pipeline to process 100+ monthly logs, optimizing routing, reducing job-time by 15%.
- Developed Tableau dashboards that improved reporting accuracy by 25%, visualizing demand and crew performance.
- Conducted data modeling to identify high-value customer segments, leading to a 12% increase in customer retention.

PROJECTS & CERTIFICATIONS

Marcus's Portfolio – Online Portfolio

January 2026

- Interactive portfolio built to mimic the Cursor IDE. Showcases resume, projects, and experience through a file explorer, tabbed editor, and mock AI chat pane, built with HTML, CSS, and JavaScript, deployed on Vercel.

Nick-Blendz Barber Website - Online Booking Application

June 2025 – July 2025.

- Built + deployed full stack booking platform using Next.js, TypeScript, and AWS EC2, S3, and RDS supporting 100+ users.
- Designed database schema and backend to manage scheduling and client data, reducing manual booking work by 80 percent.
- Integrated third party scheduling API and built analytics dashboards to track booking volume and retention.

Medi-Scribe - AI Medical Transcriber

September 2025 – Present.

- Developing a HIPAA compliant AI medical transcription system using AWS (S3, Lambda, Transcribe Medical, Bedrock) and React to automate audio capture, transcription, and accurate clinical summarization.

Document Management System - Relational Database Based Application

June 2024 - July 2024.

- Built a PostgreSQL based document management system for a real estate investor, improving data organization.
- Designed a relational schema and SQL backend using JSON to streamline property and record management.

AWS: Certified Cloud Practitioner (CLF-C02), Certified AI Practitioner (AIF-C01), now preparing for Solutions Architect Associate (SAA-C03)

MICROSOFT AZURE: Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900), Azure Data Fundamentals (DP-900)

COMMUNITY ENGAGEMENT

Kappa Theta Pi

Seattle, WA

Fraternity Member – Worked in a cross-functional team to create and deploy webpage for professional fraternity.

January 2026 – Present

NetworkAI

Seattle, WA

Director of Technology – Leading club-sponsored workshops to teach and develop AI solutions and projects.

January 2026 – Present

Business Impact Group

Seattle, WA

Consultant – Collaborated with client Socratics.ai. Was invited to return after engagement for internship.

January 2026 – March 2026
