MARCUS CLEMENT

425-757-6331 | mvcus8235@gmail.com | www.linkedin.com/in/marcus-clement27 | Greater Seattle Area | marcusclementportfolio.vercel.app

EDUCATION

University of Washington (3.93 GPA) — **Seattle, WA**
Pursuing B.S. Informatics (Data Science) — *September 2025 – June 2027*

Bellevue College — **Bellevue, WA**
Completed Associate's in Arts and Sciences — *September 2023 – June 2025*

CORE SKILLS

Agentic Automation	**Amazon Web Services**	**Full-Stack Development**
AI Enablement and Integration	**Solutions Architecture and Solutions Engineering**	**Prompt and Context Engineering**

Technologies: Python, AWS, Azure, GCP, LangGraph, SQL, RAG, MCP, Java, Next.js, React, Git, Amazon Q Business, JavaScript, Typescript

EXPERIENCES

Proofpoint – *AI Integration Engineer* — *Remote* **September 2026 – Present**
- Designed AI governance controls, including a Deny by Default permission model and approval workflows for skills + agents.
- Defined data prioritization plan for agentic renewal justification automation, outlining priorities and next steps for rollout.

Proofpoint – *AI Integration Engineer Intern* — *Remote* **June 2026 – August 2026**
- Built agentic automation for 400+ multi-service accounts, cutting report generation time 92% and protecting $762M ARR.
- Drove cross-functional enablement and governance for enterprise rollout of agentic AI platform across Proofpoint.
- Translated ambiguous stakeholder goals into agentic AI workflows, owning scoping and delivery from pilot to production.
- Architected agentic pipelines integrating Salesforce and Totango APIs with multi-step LLM orchestration and guardrails.

Socratics.ai – *AI Systems Engineer Intern* — *Seattle, WA* **March 2026 – May 2026**
- Engineered AI document processing pipeline for financial data ingestion, model-driven classification, and HITL validation.
- Presented AI workflow architecture to executive team, defining automation strategy and feature priorities for production.

AirPLAi Sports – *AI Product Engineer Intern* — *Seattle, WA* **January 2026 – March 2026**
- Engineered prompt and context strategies for production AI chatbot, implementing guardrails and scoping new features.
- Built agent workflows and data retrieval logic in Python using LangGraph and FastAPI.
- Implemented UI accessibility features for sports AI chatbot, adding inline tooltip overlays for key term definitions.

Web Impact UW – *Software Engineer* — *Seattle, WA* **January 2026 – June 2026**
- Developed features across React frontend, API routes, and backend, owning implementation to deployment under deadlines.
- Collaborated cross functionally with design and product leads to deliver user focused web solutions for external clients.

Costco Wholesale – *Member Service Agent* — *Issaquah, WA* **February 2024 – January 2026**
- Assisted customers through complex issues via chat/phone, translating technical processes into clear explanations.
- Consistently exceeded performance expectations by over 50% through strong communication and problem solving.

PROJECTS

Personal Productivity System – *Custom Obsidian Dashboard* — **April 2026**
- Built a full-stack Obsidian dashboard unifying tasks and live data from WHOOP, Strava, and Google Calendar APIs.
- Built an OAuth 2.0 pipeline (Python, launchd) syncing WHOOP and Strava sleep, recovery, and HRV data daily.
- Deployed a Dockerized MCP server linking Claude to Obsidian for AI-driven notes, file management, and daily briefs.

Marcus's Portfolio – *Online Portfolio* — **January 2026**
- Built a developer portfolio styled as an IDE with file explorer, tabbed editor, and drag-and-drop UI using HTML/CSS/JS.
- Integrated a real-time AI chatbot powered by Claude Haiku via Vercel serverless functions and SSE streaming.
- Connected structured JSON knowledge base with metadata to Haiku integration using RAG to ground responses.

Mediscribe – *AI Medical Transcription System* — **September 2025 – December 2025**
- Architected HIPAA-compliant medical transcription pipeline on AWS (S3, Lambda, Transcribe Medical, Bedrock).

CERTIFICATIONS

AWS (4x): Solutions Architect (SAA-C03) - Associate, Cloud Practitioner (CLF-C02), AI Practitioner (AIF-C01), AI Business Strategist (AIB-C01)
AZURE (3x): Azure Fundamentals (AZ-900) + Azure AI Fundamentals (AI-900) + Azure Data Fundamentals (DP-900)

COMMUNITY ENGAGEMENT

Kappa Theta Pi — **Seattle, WA**
Education Committee Director – Directing career development content for professional tech fraternity members. — *January 2026 – Present*

NetworkAI — **Seattle, WA**
Director of Technology – Leading club-sponsored workshops to teach and enable AI skills and projects. — *January 2026 – Present*

Business Impact Group — **Seattle, WA**
Consultant – Collaborated with client Socratics.ai. Was invited to return after engagement for internship. — *January 2026 – March 2026*

Other Campus Involvement*: AWS Cloud Club, Claude Builder Club, Web Impact UW, UW Newman Center*
