EDUCATION

University of Washington (3.9 GPA) <i>Pursuing B.S. Informatics (Data Science)</i>	Seattle, WA <i>September 2025 – June 2027</i>
Bellevue College <i>Completed Associate's in Arts and Sciences</i>	Bellevue, WA <i>September 2023 – June 2025</i>

CORE SKILLS

Agentic Automation Business Intelligence	Cloud Computing (AWS) Full-Stack Development	Data LLMs
Technologies: Python, AWS, Azure, GCP, R, SQL, Tableau, Excel, Java, TypeScript, Next.js, React, Git, AI, Tailwind CSS, QuickSuite, JavaScript		

EXPERIENCES

Proofpoint – <i>AI Integrations Engineer Intern</i>	Remote	June 2026
Incoming 2026 Summer Intern		
Socratics.ai – <i>Software Engineer Intern</i>	Seattle, WA	March 2026 – May 2026
- Engineered AI document processing pipeline for financial data ingestion, model-driven classification, and HITL validation. - Presented AI workflow architecture to executive team, defining automation strategy and feature priorities for production.		
AirPLAi Sports – <i>AI Product Engineer Intern</i>	Seattle, WA	January 2026 – March 2026
- Tuned AI chatbot prompt workflows and data retrieval logic in Python (FastAPI / LangGraph.) - Created UI + Backend features, debugging, running tests, and resolving CI/Dev issues. (GCP, Docker, React / Next.js). - Built cloud-based data pipelines and features that improve data reliability and operational workflows.		
Web Impact UW - <i>Full Stack Developer</i>	Seattle, WA	January 2026 – June 2026
- Developing features across React frontend, API routes, and backend, owning implementation to deployment under deadlines. - Collaborating cross functionally with design and product leads to deliver user focused web solutions for external clients. - Implementing UI components with shadcn and delivering maintainable code with best practices through GitHub workflows.		
Costco Wholesale - <i>Member Service Agent</i>	Issaquah, WA	February 2024 – June 2026
- Assisted customers through complex issues via chat/phone, translating technical processes into clear explanations. - Consistently exceeded performance expectations by over 50% through strong communication and problem-solving.		
Everlane Landscaping - <i>Data Science Intern</i>	Kirkland, WA	July 2025 – September 2025
- Built automated Python pipeline to process 100+ monthly logs, optimizing routing, reducing job-time by 15%. - Conducted data modeling to identify high-value customer segments, leading to a 12% increase in customer retention.		

PROJECTS & CERTIFICATIONS

Personal Productivity System – <i>Custom Obsidian Dashboard</i>	April 2026
- Built a custom dashboard aggregating task management, goal tracking, and live health metrics in a single view. - Integrated the WHOOP REST API using OAuth 2.0 with automated token refresh, pipeline to sync daily health metrics. - Deployed Dockerized MCP server to connect Claude AI to vault, enabling natural language application management.	
Marcus's Portfolio – <i>Online Portfolio</i>	January 2026
- Built a developer portfolio styled as a an IDE with file explorer, tabbed editor, and drag-and-drop UI using HTML/CSS/JS. - Integrated a real-time AI chatbot powered by Claude Haiku via Vercel serverless functions and SSE streaming. - Connected structured JSON knowledge base with metadata to Haiku integration using RAG to ground responses.	
Nick-Blendz Barber Website - <i>Online Booking Application</i>	June 2025 – July 2025.
- Built + deployed full stack booking platform using Next.js, TypeScript, and AWS EC2, S3, and RDS supporting 100+ users. - Designed database schema and backend to manage scheduling and client data, reducing manual booking work by 80 percent. - Integrated third party scheduling API and built analytics dashboards to track booking volume and retention.	

AWS: Certified Cloud Practitioner (CLF-C02), Certified AI Practitioner (AIF-C01), now preparing for Solutions Architect Associate (SAA-C03)

MICROSOFT AZURE: Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900), Azure Data Fundamentals (DP-900)

COMMUNITY ENGAGEMENT

Kappa Theta Pi <i>Education Committee Director – Directed development content for professional tech-based fraternity members.</i>	Seattle, WA <i>January 2026 – Present</i>
NetworkAI <i>Director of Technology – Leading club-sponsored workshops to teach and develop AI solutions and projects.</i>	Seattle, WA <i>January 2026 – Present</i>
Business Impact Group <i>Consultant – Collaborated with client <u>Socratics.ai</u>. Was invited to return after engagement for internship.</i>	Seattle, WA <i>January 2026 – March 2026</i>
Other Campus Involvement: AWS Cloud Club, Claude Builder Club, Web Impact UW, UW Newman Center
